

Website performance testing for beginners

2021.03.16

Istvan Hegedus

istvan_hegedus@epam.com

Agenda

- What is performance testing? Why it is important?
- How to start performance testing? (JMeter example)
- What are the common pitfalls?
- What other tools can help you?

1. Performance teszteltél már valaha?

- a) Igen, minden projektemen.
- b) Igen, előfordult már.
- c) Nem, de performance profiling eszközt már használtam.
- d) Nem, soha.

Questions

- Send the questions in Zoom using the Q&A section and I will try to answer them at the end.

Performance Testing

- Non-Functional Testing (ISO/IEC 25010)

Pic: <https://www.dominos.com.au/30-min-or-free>

Performance Testing

- Non-Functional Testing
- Performance testing is an umbrella term for testing focused on performance (responsiveness) of the system or component under different volumes of load.

Performance Testing

- Non-Functional Testing
- Performance testing is an umbrella term for testing focused on performance (responsiveness) of the system or component under different volumes of load.
- Time Behaviour, Resource Utilization, Capacity

Why it is important?

**PÉNTEKEN
BLACK FRIDAY**
ÁRUHÁZAINKBAN ÉS WEBÁRUHÁZUNKBAN

Köszönjük az eddigi óriási érdeklődést!
Most szükségünk van néhány órára, hogy
a beérkezett brutális mennyiségű
megrendelést feldolgozzuk.

Ne aggódjatok, lesz időtök és lehetőségek
folytatni a vásárlást, várhatóan néhány óra
múlva újra rendelkezésekre állunk,
és szükség szerint meghosszabbítjuk az akciót!

Áruházaink továbbra is óriási árukészlettel
várnak Titeket.

Kövessetek minket Facebook-on, ahol első
kézből értesülhettek a webáruház
újraindulásáról!

Elnézéseketek kérjük, és köszönjük
a megértéseketek!

MediaMarkt

Upsz, megteltünk!

Jelenleg minden bitünk foglalt!
Nézz vissza pár perc múlva,
hogy a már oldalunkon lévő látogatók
biztonsággal befejezhessék a vásárlásukat!

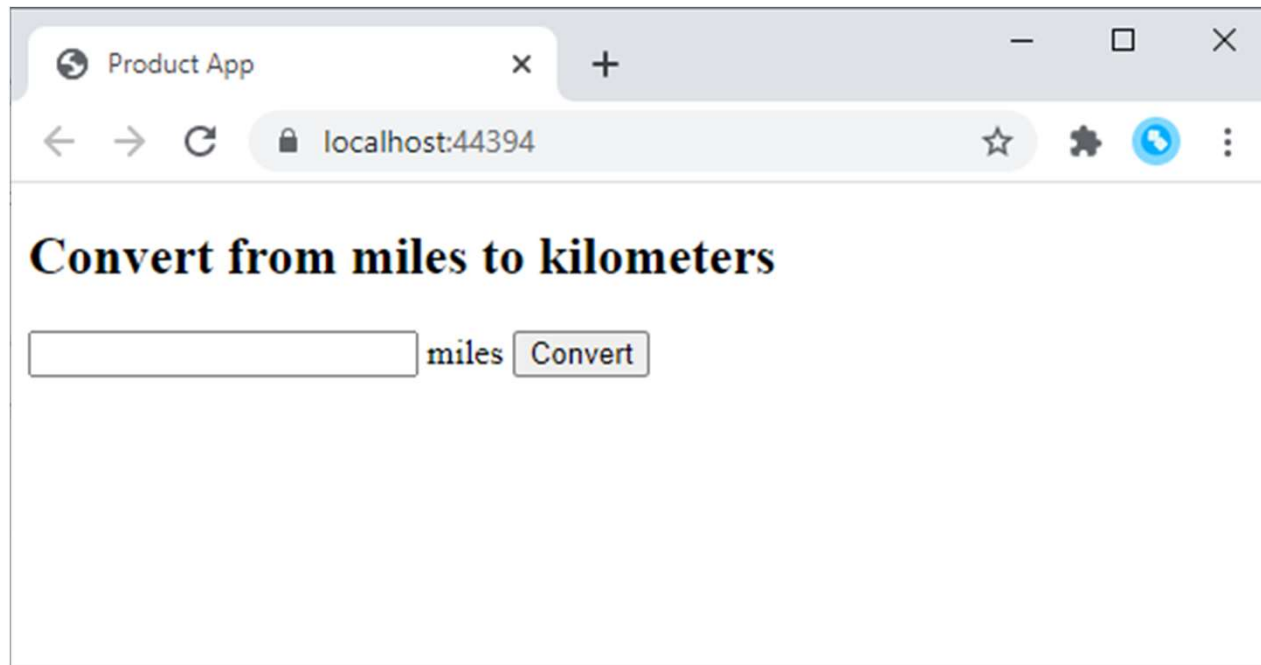

[IDE kattints az oldalunk újra töltéséhez! »](#)

Pics: <https://www.neurosciencemarketing.com/blog/articles/if-your-customers-have-to-wait.htm> and http://www.penzcentrum.hu/vasarlas/hatalmas_bukta_az_extreme_digital_akcioja.1042731.html
and https://hvg.hu/tudomany/20181123_black_friday_mediamarkt_webshop_online_rendeles_akciok

So we get the task to do
performance testing...

The Web Application to test

Analyze the requirements!

2. Fejlesztés során szoktátok vizsgálni az alkalmazás várható terhelését?

- a) Igen, mindig.
- b) Igen, de csak a teljesítmény kritikus részeket.
- c) Nem, csak a monitoring rendszert figyeljük.
- d) Nem, soha.

Requirements Analysis

Resources

Choose a tool!

You have lot of option to choose from...

Try to create a test!

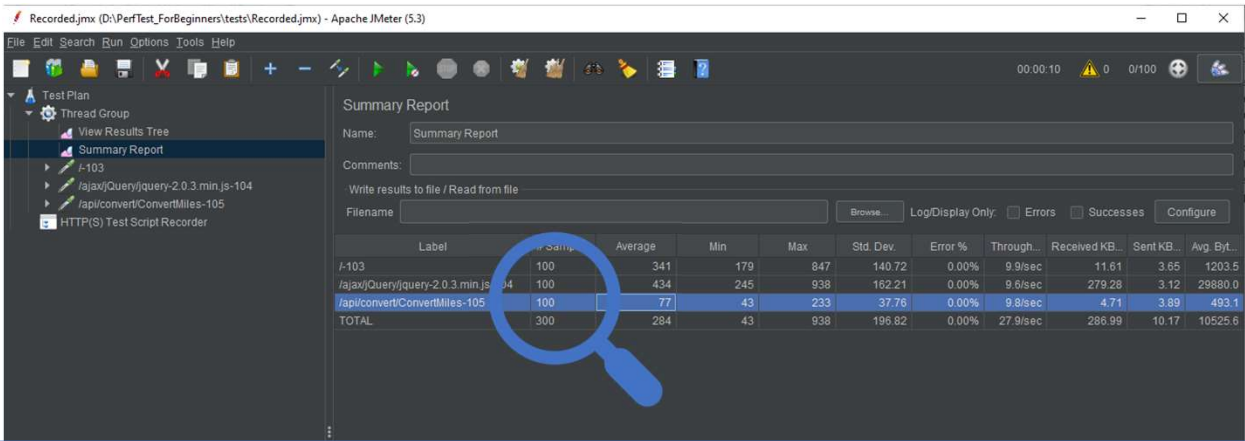

Let's create a Performance Test!

Record and Playback

„Hello World!”

Execution results #1

Label	# Samples	Average	Min	Max	Std. Dev.	Error %	Through...
/-103	100	341	179	847	140.72	0.00%	9.9/sec
/ajax/jquery/jquery-2.0.3.min.js-104	100	434	245	938	162.21	0.00%	9.6/sec
/api/convert/ConvertMiles-105	100	77	43	233	37.76	0.00%	9.8/sec
TOTAL	300	284	43	938	196.82	0.00%	27.9/sec

Enable proxy for localhost: <https://stackoverflow.com/questions/57419408/how-to-make-firefox-use-a-proxy-server-for-localhost-connections>
And import certificate from the JMeter bin directory!

Pic: <https://www.memecreator.org/meme/booom-were-done-here/>

Except....

Except #1 : Monitoring shows different data!

- **Monitoring on production shows different data!**
- Response time:
 - Monitoring avarage: 1010 ms
 - Performance test results: 1 ms

Select operation

OPERATION NAME	DELTA	↑↓	DURATION (AVG)	↑↓	COUNT	↑↓	🔍	PIN
Overall			506 ms		200			
GET Convert/ConvertMiles	↗ 990.46%		1.01 sec		100			
GET /index.html	↘ -5.81%		2.48 ms		100			

Investigation #1

- Why is that?

Investigation #1

- Why is that?
- We are using Cache in the tested application!

```
1 reference
public double GetCachedConvertedValue(double distanceInMiles)
{
    double cacheEntry;

    if (!_cache.TryGetValue(distanceInMiles, out cacheEntry))
    {
        Thread.Sleep(1000);

        // Key not in cache, so get data.
        cacheEntry = Converter.ConvertFromMilesToKm(distanceInMiles);

        // Set cache options.
        var cacheEntryOptions = new MemoryCacheEntryOptions()
        {
            // Keep in cache for this time, reset time if accessed.
            .SetSlidingExpiration(TimeSpan.FromSeconds(30));
        };

        // Save data in cache.
        _cache.Set(distanceInMiles, cacheEntry, cacheEntryOptions);
    }

    return cacheEntry;
}
```

Fix #1

- Generate test data and use test data feed!
- Always validate the results with Monitoring!

CSV_DataSet.jmx (D:\PerfTest_ForBeginners\tests\CSV_DataSet.jmx) - Apache JMeter (5.3)

Except #2 :

- Monitoring shows the same!
- But why are the responses times less than 1 sec?

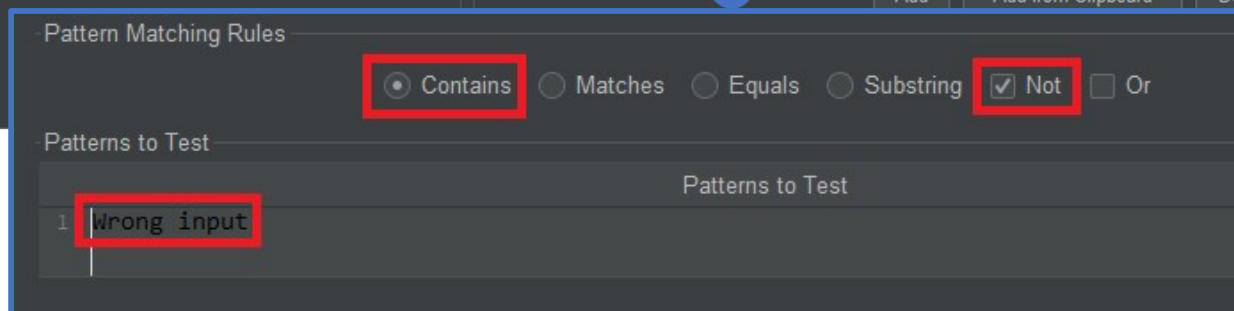

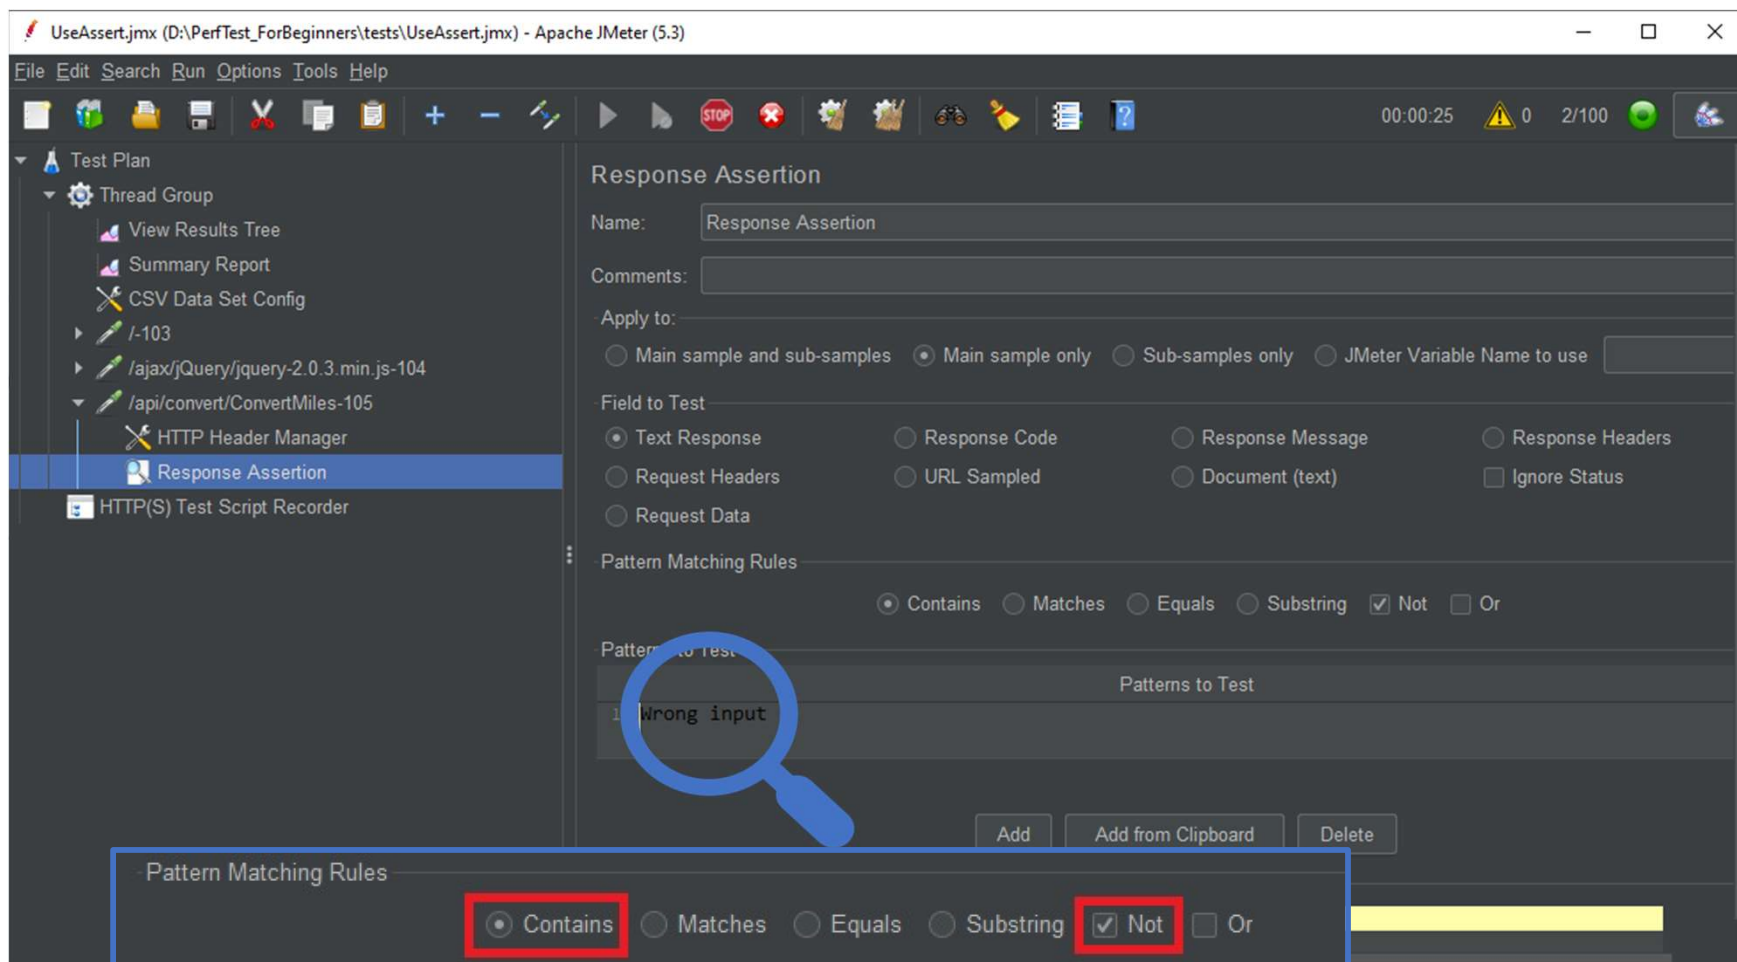

Investigation #2

- Why is that?
- "1,000.2" vs "1 000,3" (hungarian number formatting)
- Gives back error message in the response!

Name		×	Headers	Preview	Response
<input type="checkbox"/>	ConvertMiles?distanceInMiles=111		1	Wrong input	
<input type="checkbox"/>	ConvertMiles?distanceInMiles=111

Sampler result Request Response data

Response Body Response headers

Find

1 HTTP/1.1 500 Internal Server Error

2 Server: Microsoft-IIS/10.0

3 X-Powered-By: ASP.NET

Problem #3 : Requests failed!

- The requests failed with HTTP 500 Internal Server Error

Investigation #3

- Why is that?
- "simulateError" input fails the request

```
{  
    if(distanceInMiles == "simulateError")  
    {  
        throw new Exception("Intentionally throw exception when simulating error");  
    }  
}
```

Fix #3

- Execute smaller smoke test before long running execution!

Next Steps...

Create informative reports for others!

- `jmeter -g <log file> -o <Path to output folder>`

Apache JMeter Dashboard

[Dashboard](#)

Test and Report information

Source file	"results2.jtl"
Start Time	"3/15/21 11:02 PM"
End Time	"3/15/21 11:03 PM"
Filter for display	""

Response Time Overview

■ Requests having response time <= 500ms ■ Requests having response time > 1,500ms ■ Requests having response time > 500ms and <= 1,500ms ■ Requests in error

Requests Summary

Create more complex scanrios

- Execute scripts to manipulate test data/responses
- Authentication
- Cookie Managment
- (Web Driver Sampler)

Get familiar with performance test types

- Load Testing
- Stress Testing
- Scalability Testing
- Spike Testing
- Endurance Testing
- Concurrency Testing
- Capacity Testing

What we covered

- We discussed what is performance testing and why it is important.
- We created an example in JMeter.
- We checked some common issues.
- We see the importance of validating test results with monitoring.

Suggested material: ISTQB Performance Testing syllabus

Poll 3. Milyen témáról hallanál még szívesen?

- a) Performance teszt típusok és implementálásuk
- b) Autentikáció megoldások performance tesztekben
- c) Egy bonyolultabb felhasználói interakció implementálása
- d) Adatbázisok performance tesztelése
